

## **About:**

The inspiration behind Euro Kitchen was born out of the love of animals, their wellbeing, and their welfare and, of course, for the wellbeing of humankind and the planet. We probably cannot change the world due to greater corporate, government and commercial agendas right now. However, we can present an alternative and challenge the train of thought through our vegan cuisine; foods that do not lack taste, flavour and traditional character.

Being of European background, we had 'meat' forced into our diet and this was 'standard/traditional' – wrong! We present you with traditional European dishes from various countries/regions that will hopefully make you gasp in disbelief as to their likeliness and full flavour; the best part of it all – it is 100% vegan.

We hope you enjoy the Euro Kitchen experience.
